Snoozee
Sleep Trainer & Clock Instruction

The Snoozee Sleep Trainer Clock has been designed to help toddlers start to understand the concept of day and night by using visual concepts of light and familiar imagery, and then a digital display as they start to recognise numbers.

- The product can last up to 7 days without charge, meaning no need for mains cables next to the bed and perfect for home and away
- There are 7 levels of brightness to provide a reassuring glow without being too bright at bedtime
- Uses the child friendly 12-hour clock

HOW TO USE

FIRST TIME USE
To power up the product for the first time, you'll find a small hole located on the back to the left of the batch code (1). Insert a small device tool or pin to activate the product. The display screen will appear. (2)

This operation is only required for the first time of use.

You will then need to switch on the device by using the ON/OFF button
